EVERY CHARACTER GETS 3 BOXES - TICK THE KEEPERS

THE RULES

- write the character in all THREE boxes - vary naturally, don't trace-copy
- then TICK the circle above every version you actually like
- 1st ticked version = the letter in your font
- 2nd & 3rd ticked = rotating alternates (repeats won't look cloned)
- no tick on a version = it is thrown away - a botched box costs nothing
- no tick on ANY of the three = all non-empty boxes get used

TICKING

- keep the tick INSIDE the circle - a stray tick inside the box would become part of the letter

UP-DOWN: the solid line is the floor, the dashed line is the body height

LEFT-RIGHT: anywhere in the box is fine

- keep the character roughly centered, with a little air on both sides
- exact left-right position does NOT matter - letter spacing is measured from the ink itself, not from the box
- never touch the gray border: ink on the border gets cut off
- width is free: a wide m and a narrow i are both fine

How to draw the tricky ones (do not scan this page)

DIACRITICS - accents live above the body; they may go higher than the dashed line

háček above
the body

caron beside
the stem

ring on top

capital + accent:
squeeze up top

ogonek hangs
below the line

stroke through

PUNCTUATION & SYMBOLS - draw them where they sit when you write a sentence

on the solid,
tail below

quotes float
up high

low quote: on
the solid line

full height

like a capital

middle of
the box

draw it big,
centered

LIGATURES - write the PAIR as one joined movement, no pen lift if you can

joined th

joined fi

GOLDEN RULES

- the BIG character above the first box (with its name, e.g. "ě e + háček") tells you what the three boxes want
- one pen for everything - Light & Bold are computed later
- empty boxes = character skipped, that's OK

BEFORE YOU START

- natural speed beats careful hesitation
- print at 100% / actual size - never "fit to page"

write each character 3x, then TICK the circle above every version you like - unticked versions are discarded
